

National Archery in the Schools Program

March 1, 2024

Dear parent and/or school official,

Your school has been identified as a participant in the National Archery in the Schools Program (NASP®). In its 21-year history, the program has involved over 21 million students in grades 4-12 with in-school archery lessons. NASP® is constantly working to improve our program and one of the best ways to do that is to ask current NASP® participants for their opinions about their experiences.

NASP® is asking any current NASP® participant in grades 4-12 to take part in a brief online survey regarding their program experiences. The survey should take about 3 - 5 minutes to complete.

Please note that no student is required or compelled to participate in this survey for any reason by anyone; participation in the survey is strictly voluntary. This survey is also anonymous - no personal or identifying information has been or will be collected by NASP®.

All individual responses will remain confidential. Participation in this survey is intended solely for the purpose of providing feedback as a participant of NASP®.

NASP® encourages you to consult all state and local school district policies regarding any survey distribution approval practices (if any) prior to administration of this survey. We are therefore including this letter as an introduction to the survey.

**Again, thank you for helping us improve NASP® for the next
21 million students!**
